About This Game

They lived normal lives in a small city in the heart of a prosperous country. They never knew that occasional clashes between separatists and the government might dissolve into armed conflict until it all went heels over head. Now they're caught in the middle of war zone as a deadly conflict turns the country into a wasteland. They aren't soldiers, and they aren't warriors. But they are going to survive.

Your mission: lead a group of civilians out of the war-torn country.

This won't be easy. You'll be able to avoid the battlegrounds but not other survivors, squads, gangs and hordes - and you'll never know what their intentions are. Your choices will include hiding or attacking, and negotiating or engaging in trade, but you'll always want to think twice since the lives of the entire group will be at stake.

CHOOSE

You can take only five people with you, so choose carefully. Some are good at providing first aid, others are excellent negotiators and still others have a way with technology.

DECIDE

You'll make your way through the open map. You decide where to go next.

SURVIVE

Plan your way and carefully select your actions when coming across other teams. Improve the skills that will apply to your survival strategy.

ENJOY A SURVIVAL NARRATIVE

Your team is represented by tokens on the map. You interact with the game through dialog and observe card-style battles. Your tasks: plan, guide and operate.

Played the demo first hand during Casual Connect back in 2016 and immediately fell in love with the puzzle and the mysterious narrative behind the game.

If you like hard puzzle games, then this is the game for you because it gets quite hard progressively. Also what not to love of the little bouncy characters <3. Awesome game with unique artstyle and gameplay! Definitely worth spending few evenings on this classic style RPG!. One of my favourites!. I have found this game very enjoyable to play and read. I would be glad to suggest to anyone whom enjoys visual novels to invest in a copy of the game.

This visual novel is about a young lady name Lilia whom works in a bakery with her grandmother, and is visited by her childhood friend Ronan. One day, she discovers she has turned into a Lucretia as a half-human and half-cat creature, she panics and her adventure into the world where being different causes hardships and sometimes even hatred, and the trials she faces as she tries to cope with the change she has experienced. Follow in her footsteps in the game as she faces these trials and also seeks friendship and love from her childhood friend and interacts with her other companions.

There are 2 main paths in the game, Human path where your choices are to regain your identity is towards your humanity, or to follow your instincts as a Lucretia and seek to belong as the entity you are a part human and feline person. If you complete both choices in a single session additional bonus content opens.

I personally rate it 5 stars.

I love revisiting my favorite stories time and again and this game has earned its place among that list. An extremely well thought out and fun visual novel. Please keep up the good work Bakufu Narayama/Chu-3 :)

I have also added a general guide to the achievements and other content available for this game. Feel free to look it up in the guides section for this game.. Another great time management\strategy game to play.

As with the original, you have to gather enough resources to rebuild The Wall. This one features a caravan where you can store items for use in the next level. That has its pros and cons, There is also a store where you can buy upgrades for your various buildings. I was pleasantly surprised they added such new features in only the 2nd installment of the game.

I tried to fill the caravan before I dropped down to 2 stars. It was challenging but not too much. The graphics are beautiful. Some levels have an artifact that need to be collected. You learn a little bit about the artifacts so that's a plus.

For the cons:

There were a few times where my laptop died or I had to restart the level. The goodies from the caravan were gone. You don't

want to start a level with no resources. >.< 3 stars is still doable though.

The bonus mini-game is a pain. You have to click on all of the nomads that are invading your camp. It is nothing more than a CLICKFEST. Carpal tunnel nightmare. Absolutely, hated it. The mini-game usually pops up during the middle of a level.

For as great a game as this is, they should have come up with a better mini-game or better yet a SKIP option.

I still love the game despite the mini-game and I do recommend it.. An exceedingly repetitive game whose challenge can be described as cheap, Many deaths were beyond my control or ability, especially when it comes to black soldiers being paired up with other enemy soldiers. The moment you knock the black ones down, you lock into an attack animation that leaves you open to attack and you need to jump out of it to be able to do anything else. Archers and cannons can fire before you even get them on screen, hitting you before you can hit block. Archers can also run faster than you're capable of, so you need to stop and let them fire before you can attack them.

A well constructed challenge is something that you, hypothetically, complete a stage on your first go based on skill and ability. This game is purely rote memorization of stages to a point where you can mechanically react to whatever is coming so that you can proceed.. it releases updates very fast and it has some lags if you're playing on a weak computer but if you like a creative or sandbox games you should try this game. Ten dollars for this basic edition of Risk is too much, you can [purchase a physical version and get the full indepth experience for that kind of price (obviously plastic or paper pieces)

But for 5 or less, it's not bad, I'd even recommend it for 50% off or more. The AI is smart on hard, it's simple click and or drag and thats all.

OH man it just takez 10min to finish this game,can you update more?. E.Wolf's +5

1. If you like spreadsheets, you will enjoy this game. If you dislike spreadsheets, you will be bored.
2. There is an incredible amount of customization. From the playbook to each player's stats, everything can be edited to make the game however you want it.
3. There is also an incredible amount of detail. Each player has a variety of stats beyond what is offered in games like Madden NFL. Player performance changes their stats and benching players can both upset them and reduce their stats. The teams actually feel like teams instead of lists of individual players.
4. With this being a spreadsheet-focused game, there is a plethora of statistics available to analyze. This is extremely useful for determining what your team needs to succeed.
5. The off-season is incredibly detailed and realistic. I enjoyed the off-season more than the season due to the incredible customization and the hope for success next season.. Very good DLC buy it!. TLDR: Its fun in short bursts but has problems. Not bad for \$10 but would I recommend the game? Id say... maybe, if you have nothing better to do, Kinda feels like a mobile game ported to pc.

I always wanted a game where you could play as a zombie and/or control a horde of zombies. Such games are surprisingly rare in the zombie game genre, were 99% of the games are about you killing zombies or trying to survive the zombie apocalypse. I think the last time I played a game where you were a zombie and controlled a horde of zombies was Stubbs the Zombie. So I was pretty much sold on this game when I saw the little trailer for it on this page. While its fun in short bursts, I have ran into numerous bugs that made me fail or otherwise have to restart levels. At \$10 its not so bad but theres still just enough of a lack of content for the game to get a tad boring. There are different zombie hordes with different abilities but I feel the abilities arent very noticable due to how short they last.After finally beating the first level, I unlocked the frankenstien monster horde, and used the ability to summon the super super zombie hulk thing and it died pretty much instantly and has a very long cool down time like every other ability. It would have been awesome if you could combo destruction and eating people to reduce the cooldown time of your abilities to you can use them more often.

The game also seems to have random difficulty spikes, and I dont think it has much to do with the horde type you choose. One playthrough had a tone of cops show up early on and brutalize my horde but in a different playthrough ther was hardly any opposition until the very plast part of the level were you have to destroy the monument. Like I said, there are bugs. Sometimes the QTEs will just flash way too fast, like there are fast QTEs in the game but then there are glitchy ones that are impossible. Sometimes controls wont respond, particularly when trying to enter a building. Othertimes, certain units that your supposed to kill wont spawn, or will spawn in an inaccessible area. There were multiple times were my horde got stiuck, sometimes the game corrects itself but other times I had to restart. There was one time where my horde of like 2200 zombies got stuck and 2 soldiers managed to kill them all.

. When the nights hits thats when all hell break loose! On the side note, there are alot of weapon in the well near the starting area. Like if you know where the well is :). Amazing Game I usually don't call things perfect because perfection is unachievable but this game came the closest. Out of all the big releases of triple A Studios this game doesn't even have to worry about competition because it's just so much better and more advanced than any of the other releases this year. Honestly it's hard to even wrap your mind around all the resarch and effort that the devs put into this game to make it such an amazing product.

Rated: 420 / 69 (FBI approved). I really enjoy ANNO 2070, and this is an older game but it is another refreshing game in this series. It is basically a simpler version of 2070 set in an older era. It is a lot of fun but makes me want to just go play 2070 with more depth.. All these vagrants in the review section who didn't bother doing the speed trials or bonus level
